About Us

Jarurat Renewable Energy is a **trusted solar energy solutions provider** committed to **delivering efficient, reliable, and cost-effective solar power systems**. We help homes, businesses, and industries transition to **clean energy while reducing electricity costs and carbon footprint**.

With a focus on quality execution and long-term performance, **we offer complete solar solutions** - from system **design to installation and commissioning**.

Vision

To accelerate **India's transition to clean energy** by making **solar power accessible and affordable** for all.

Mission

To design and deliver high-quality solar power systems that **ensure energy independence, sustainability, and long-term value** for our clients.

Why Choose Us?

- Tailor-made renewable energy solutions
- End-to-end service from assessment to installation
- Government-compliant systems eligible for subsidies
- Affordable & accessible for rural, and urban homes
- Partnered with NGOs, CSR initiatives, and energy programs

Our Solar Services

Solar Power System Installation

We specialize in customized solar panel installations **tailored to meet residential, commercial, and industrial energy requirements**.

Our offerings include:

- On-Grid and Off-Grid Solar Power Systems
- Hybrid Solar Power Systems
- Residential, Commercial & Industrial Installations
- EPC (Engineering, Procurement & Construction) Services
- Government subsidy and compliance support

Our Approach

1. Site Assessment & Custom Design – Detailed analysis to suit your needs
2. Professional Installation – Certified and safe installation process
3. Government Subsidy Support – Documentation help for incentives
4. Training & Support – After-installation assistance and maintenance
5. Post Site Installation Services – End-to-end maintenance and complete data analysis

We deliver holistic renewable energy ecosystems with precision and human-centric service.

Our Projects (Solar Installation)

Raxaul, Bihar

Installed a customized **commercial/industrial solar power system in Raxaul**, enabling the client to adopt clean and reliable energy while significantly reducing electricity costs and carbon footprint.

Project Details:

- Client Name: **BellWhether Energy Pvt. Ltd.**
- Project Commencement Date: **06 December 2025**
- System Capacity: **10 kWp**
- System Type: **3 Phase On-Grid Solar System**
- Project Location: **Raxaul, Bihar**
- Process Involved: EPC (Engineering, Procurement & Construction)

Highlights:

1. Tailored solar panel system designed for commercial/industrial use
2. Reduced dependency on conventional power grid
3. Significant savings on electricity bills
4. Reliable and efficient system performance

Muzaffarpur, Bihar

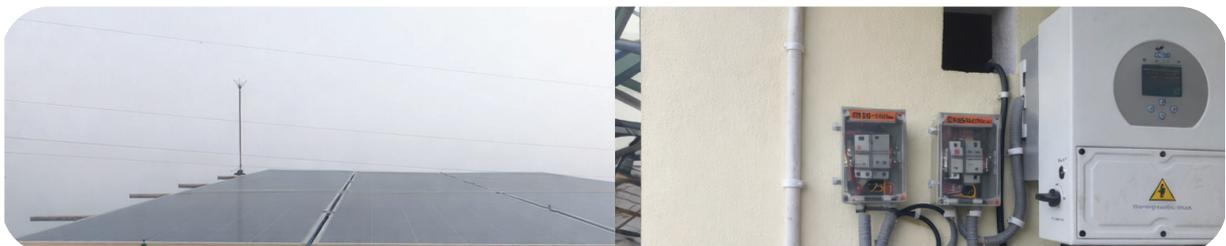

Successfully **completed a residential solar installation in Muzaffarpur**, empowering the homeowner to harness clean energy, achieve long-term cost savings, and promote sustainable living.

Project Details:

- Client Name: **Rakesh Kumar**
- Project Commencement Date: **06 January 2026**
- System Capacity: **5 kWp**
- System Type: **1 Phase Hybrid Solar System**
- Project Location: Muzaffarpur, Bihar
- Process Involved: EPC (Engineering, Procurement & Construction)

Highlights:

1. Efficient solar design optimized for local conditions
2. Hybrid system ensuring power availability and reliability
3. Support for government benefits and compliance
4. Long-term performance with minimal maintenance

What sets Us apart:

Proven EPC expertise with real on-ground projects

Customized solar solutions designed for your exact energy needs

High-quality components for long-term efficiency and durability

Transparent processes, honest pricing, & professional execution

Dedicated support from planning to post-installation

Whether you are a **homeowner, business, or industry**, we ensure a **smooth transition to clean energy** with confidence and clarity.

switch to solar 

Let's power your future with clean energy.
